Thesis and Dissertation:

Dunne, J. P. (2019). Level of mindfulness in persons with anorexia nervosa entering residential treatment and the relationship with eating disorder symptomology and clinical indicators of health (Doctoral dissertation). Ann Arbor, Michigan: ProQuest LLC. (13805577)

RESEARCH AND SCHOLARSHIP:

My main research and scholarly interests are related to mindfulness and well-being, especially promoting mental health. I have worked with diverse populations and have particular experience working with nurses/healthcare workers, persons with eating disorders and Asian-American populations. I have special interests in using Mindfulness Based Cognitive Therapy (MBCT) and adaptations to improve mental health. I believe in a holistic and collaborative approach to research, and to wellness in general, and seek opportunities to act as principal investigator, but also to support others in their research.

SELECTED PRESENTATIONS:

Dunne, J. P. (2019, Oct.). "Mindfulness in Individuals with Anorexia Nervosa." Concurrent 45-minute session presented at the American Psychiatric Nurses Association 33rd Annual Conference
